**BC HYDRO OSH 201 -- SECTION 4**

## 4. Specific Worker Qualification Requirements

The specific requirements below (by category) apply to workers that may be seeking LOA authorization.

### 4.1 Qualified Electrical Workers

4.1.1 **Only experienced electrical utility trades or technical workers who have achieved and maintained their qualifications may be designated as Qualified Electrical Workers.** Recognized trades or technical classifications consist of Power Line Technicians, Electricians, Cable Splicers, Winders, CPC Technologists, P&C Technologists (Engineering), Instrumentation & Controls Technologists, Meter Technicians, Project Equipment Specialists, Electrical Engineers, Power Electrical Equipment Technologists (electrical diploma only), Diesel Station Attendants, Generation and Thermal Plant Operators, Electrical Engineering Technologists (Site Engineering and Acceptance) and Field Technicians 2 (Site Engineering and Acceptance, electrical diploma only).

4.1.2 Only the following qualified electrical workers are permitted to provide Safety Watch for unqualified workers and their equipment in relation to high voltage electrical hazards (as referenced in SPR Table 401 and uninsulated equipment distance and SPR 805): Power Line Technicians, Cable Splicers, Electricians and Winders.

4.1.3 Worker's must meet the minimum requirements for QEW LOA Authorization as follows:

1. Meet the requirements of a qualified electrical worker as outlined in 4.1.1.
2. Successful completion of SAFE-401 or equivalent training received through a BC Hydro Apprenticeship and authorized to at least PSSP Category 5 or WPP Category C.
3. BC Hydro Manager Authorization

The Safe 401 assessment is to be initiated by the manager when they deem the individual is ready which can typically take up to 6 months from their start of employment or contract. Prior to the assessment and/or where gaps have been identified after completion of the Safe 401 assessment, qualified electrical workers may work up to qualified electrical worker LOA distances specified in the SPR section 400 Table 401 and Table 403 if they are working under the direct and continuous supervision of a qualified electrical worker authorized to QEW LOA.
